

Delivery Evidence Checklist

Doctor Clinic DevOps System

Final Delivery Checklist

Muhammed Munir Al Tawil · DevOps Course · May 2026

1. Repository Deliverables

Item	Status	Notes
GitLab repository	✓ Ready	gitlab.com/MunirAltawil/Doctor-Clinic-DevOps-System
README.md	✓ Ready	Installation procedure, architecture, stack
Specifications document (PDF + DOCX)	✓ Ready	Document 01
Architecture document (PDF + DOCX)	✓ Ready	Document 02
Requirements mapping (PDF + DOCX)	✓ Ready	Document 03
Delivery checklist (PDF + DOCX)	✓ Ready	Document 04 (this file)
Executive report (PDF + DOCX)	✓ Ready	Document 05
Proxmox deployment evidence (DOCX)	✓ Ready	Document 06

2. Technical Deliverables

Item	Status	Notes
Dockerfile	✓ Ready	PHP 8.2-FPM, Composer, all extensions
docker-compose.yml	✓ Ready	app + nginx + mysql, volumes, network
Nginx configuration	✓ Ready	docker/nginx/default.conf
GitLab CI pipeline (.gitlab-ci.yml)	✓ Ready	5 stages, automated tests
Kubernetes manifests (10 files)	✓ Ready	k8s/ directory
Terraform files (5 files)	✓ Ready	terraform/ directory
Backup script	✓ Ready	scripts/ directory
Monitoring plan	✓ Ready	monitoring-plan.md
Database migrations (16)	✓ Ready	database/migrations/
Database seeders (9)	✓ Ready	database/seeders/
PHPUnit tests	✓ Ready	tests/ directory

3. Live Deployment Evidence

Evidence	Status	Details
Application live on internet	✓ Live	http://51.158.200.127:8080
All 3 containers running	✓ Live	docker compose ps – Up status confirmed

Evidence	Status	Details
16 migrations executed	✓ Live	All DONE in production DB
9 seeders executed	✓ Live	Demo clinical data loaded
Vite assets built	✓ Live	public/build/manifest.json present
iptables rules persisted	✓ Live	iptables-persistent installed
VM accessible via SSH	✓ Live	ubuntu@10.10.10.100

4. Oral Defense Structure

#	Section	Key Points
1	Project context and business need	Healthcare system, DevOps motivation, team structure
2	Application overview and architecture	Laravel roles, 7-layer architecture, technology stack
3	Docker and live deployment demo	docker compose ps, open http://51.158.200.127:8080 live
4	CI/CD demonstration	GitLab pipeline screenshot, 5 stages, test results
5	Kubernetes and Terraform overview	Walk through k8s/ and terraform/ folders
6	Backup and monitoring strategy	Script demo, monitoring-plan.md walkthrough
7	Conclusion and improvements	What was achieved, what can be improved, Q&A readiness

5. Readiness Statement

The project is fully ready for final academic delivery. The repository is organized, synchronized on GitLab, supported by a live deployment on Proxmox VE, functional Docker containers, automated CI/CD pipeline, database migrations and seeders, and a complete documentation package of 6 professional documents.
